District(s):

Project Description

Principal's Priority

• •,

Align ASD science kits to real world applications and make kits available year round to K-5 teachers.

Cost: \$4,500.00

Benefits if Project is Funded

A strong science delivery for K-5 will mean students are ready to take on challenges in real world science during middle school that will prepare them for 21st century science and math careers.

Impacts if Project is not Funded

Science delivered without a real world context to support it and without flexibility for program delivery, will make it much more difficult for students to be engaged and make meaningful connections, which makes it harder for them to remember and be able to apply skills and concepts.

of Students impacted by project 216

Project Start Year 2010
Project Finish Year 2010
